The Thunder Bay Regional Health Research Institute (TBRHRI) - an independent, not-for-profit corporation - is the research arm of the Thunder Bay Regional Health Sciences Centre. Our scientists work closely with clinicians, medical professionals, and academic and industry partners to improve health care through excellence in patient-centered research. Research is advanced through discovery and development of new imaging-based technologies that are brought to patients through clinical trials. With successful trial validation, discoveries proceed to commercialization for the benefit of patients everywhere.

In conjunction with the Northern Ontario Heritage Fund Corporation, we are currently seeking candidates for the following position:

8502879 Research Assistant Internship (1 Year Contract)

The individual filling this position works closely with the TBRHRI Scientist and their time is devoted to the support and enabling of research. Specifically, the Intern will assist the Scientist with human and animal lung, brain, and biosensor MRI projects, and the comparison of different imaging methods. Further, the intern will help with coordination of the REB and Health Canada regulatory, and Animal Care Committee (ACC) documents for this study. In particular, they will help manage required study documents (manual of operations, consent forms), maintain REB and ACC approval, and train clinical staff on data collection methods.

The ideal candidate is highly dedicated and organized, with the ability to multi task in a fast-paced, diverse, and growing research environment. Exceptional organizational and communication skills, along with strong quantitative, analytic and reasoning skills are necessary. Interns must be university or college graduates who have graduated within the last three years from an accredited college or university (BSc or MSc in physics, chemistry, biology or engineering sciences preferred). The candidate must be a graduate of a post-secondary degree or diploma program. The position will be a first full-time employment in the candidate's field of study. Candidates are only eligible to participate in the internship program one time. Candidates must be legally entitled to work in Canada.

To be considered for this position, please send your resume with a cover letter to:

Dr. Mitchell Albert, Scientist
Thunder Bay Regional Health Research Institute
980 Oliver Road
Thunder Bay, Ontario P7B 6V4
Email: albertmi@tbh.net

We thank all candidates for their interest; however, only those selected for an interview will be contacted. We are an equal opportunity employer.
